

Our help comes from each other

I spend my days, think about nights
See the stars fall or drones passing by
Is that thunder or are those bombs?
Where is the sound coming from?

*Our help comes from each other
Doesn't mean we're all brothers
Doesn't mean we're not
Share what we can of what we've got*

Water's scarce children thirsty
Can't grow crops to feed the hungry
Clouds in the sky, rain won't drop
Where is our help?, when will this stop

Chor

If we survive it's an accident
Once we're born it's all our work
There is no tomorrow it's all today
There is no choice after birth

Chor

Science might help but won't save us
Nobody wears bootstraps anymore
Duck for cover as danger nears
Shield your eyes to keep sight clear

Chor or

*These are words we believe
Stand, breathe, give, grieve
Smile, comfort, empathy
Sip, walk, speak, feel, see.*
