

We have it made

A} Water flowing down the grate
Sounds like footsteps following me
I turn to look, no one's there
But I'm afraid they are

A} They whomever they may be
Are watching so carefully
My every move, what I do/ everyday
The whole day through

B} *I wasn't born paranoid
Dangerous people I avoid
No one ever catches me
Doing what I do*

A} In the darkest of the night
I wander off a path
Doing what profits me
What is it? Don't ask

B} *you said you don't care who I am
You held me tight as your last chance
You asked me to save you from
All the things you've already done*

C} When we met, did we know
Souls combined born criminals
What we'd done in the past
Together now we could surpass

C} Banks and scams, pyramid schemes
All accomplished as if our dreams
Of proving smarter than the rest
Together we were the best

We have it made

B} Lovers we took and discarded
Lovers money we took and spent
Lovers loved us though they knew
We just used them to pay the rent

C} So now we run from everyone
There's no place to hide
We must get away from here
The money held so tight

B} Open arms welcomed us
The price we always paid
We have found peace of mind
No regrets we have it made.
